## TEHNIČKE PREDNOSTI TECHNICAL ADVANTAGES

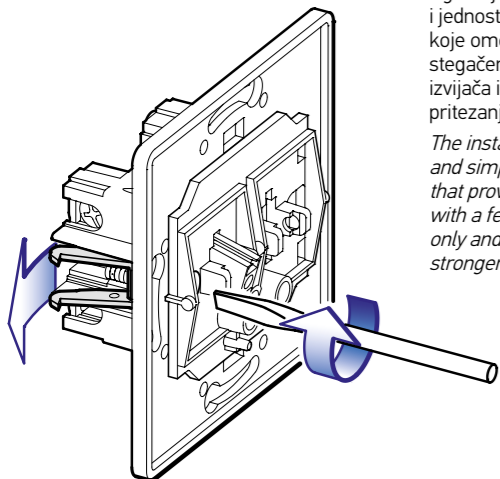

Masku i taster sklopke postavljamo i skidamo veoma jednostavno. Ova kombinacija će Vam i pored jednostavnosti obezbediti dugotrajan i pouzdan rad.  
*Installation of decorative cover frame and switch button is very simple and easy. Beside simplicity, this combination is providing a long and reliable usage.*

### BEZVIJČANA MONTAŽA SCREWLESS INSTALLATION

Bezvičajni kontakti omogućuju pouzdanu i brzu montažu do dva provodnika preseka 2,5mm<sup>2</sup>, bez upotrebe alata za stezanje.

*Screwless contacts are allowing safe and fast installation up to two conductors with diameter 2,5mm<sup>2</sup>, without screwdriver.*

Ugradnja pomoću stegača je brza i jednostavna zahvaljujući rešenju koje omogućava pritezanje stegačem sa vrlo malo okretaja izvijača i bez potrebe jačeg pritezanja vijka.

*The installation by clamps is quick and simple thanks to the solution that provides tightening by clamps with a few screwdriver turnings only and without any necessity for stronger screw tightening.*

### VIJČANA MONTAŽA INSTALLATION WITH SCREWS

Pritezanje provodnika obezbedeno je pouzdanom i sigurnom vijčanom vezom za provodnike preseka do 4 mm<sup>2</sup>. Priključivanje provodnika je veoma brzo jer je obezbedeno njegovo postavljanje bez mogućnosti isklizavanja tokom pritezanja.

*The tightening of conductors is provided by the reliable and safe screw joint for the conductors section to 4 mm<sup>2</sup>. The connecting of conductors is very quick as their setting up is secured without any possibility of slipping out during tightening.*

Plastična priključnica je izrađena tako da zauzima veoma malo prostora u montažnoj kutiji čime se montaža pojednostavljuje zbog većeg prostora za smeštaj provodnika. Priključivanje provodnika je veoma brzo jer je obezbedeno njegovo postavljanje bez mogućnosti isklizavanja tokom pritezanja.

*Socket outlet is made to take a very little space in installation box. Installation is simple because of enough space for conductors. Connecting of wires is fast since there is no possibility of slipping out when tightening.*

## BOJE PREDNJIH ELEMENATA FRONT ELEMENTS COLORS

art.605.X X X

Mogućnosti kombinacija više boja date su trocifrenom šifrom proizvoda (za kompletne proizvode) ili jednocifrenom šifrom (za mehanizme bez maske i međurama, maske i međuramove) u zavisnosti od elementa:

**prva cifra** - šifra boje maske

**druga cifra** - šifra boje međurama

**treća cifra** - šifra boje središnjeg dela (taster, blok)

Kod jednocifrenog označavanja šifra predstavlja boju jednog elementa (taster, blok, maska, međuram).

Standardno se izrađuju boje:

*The possibility of colors combination is given by three-digit code of product (for the complete products) or one-digit code (for mechanisms without mask and interframe, masks and interframes) depending on element:*

**first digit** - code of mask color

**second digit** - code of interframe color

**third digit** - code of middle part color (push-button, block)

*One digit code represents the color of one element (button, block, mask, inter-frame)*

*The standard colors are:*

Jednopolna sklopka ima dve izvedbe sklopanja (leva i desna) i u skladu s tim se povezuju priključni provodnici.  
*Single-pole switch is supplied in two wiring executions (left and right) and the conductors are connected accordingly.*

Naizmjenična sklopka, dve izvedbe sklopanja (leva i desna)  
*Alternative switch, two wiring executions (left and right)*

608  
628

Ukrsna sklopka se povezuje u kombinaciji sa naizmjeničnim sklopkama. Može se povezati neograničen broj ukrasnih sklopki u kombinaciji sa dve naizmjenične.

*Cross-switch is wired in combination with alternative switches. The unlimited number of cross switches may be wired in combination with two alternative switches.*

6191

Jednopolne indikatorske sklopke (indikacija svetli kada je sklopka uključena) za povezivanje zahtevaju multi provodnik  
*Single-pole indication switches (indication turns on when the switch is on) require neutral conductor to be wired.*

617  
6173

Povezivanje regulatora jačine svetlosti sa naizmjeničnom sklopkom kao jednopolne sklopke i regulatora sa rotacionom jednopolnom sklopkom.  
*Wiring of dimmer with alternative switch as a single-pole switch and the dimmer with rotary single-pole switch.*

Regulator jačine svetlosti sa naizmničnom sklopkom može se povezivati i u kombinaciji sa naizmničnom sklopkom za regulaciju sa jednog mesta i uključivanje i isključivanje sa dva mesta. Međusobno povezivanje više regulatora nije moguće.

*Dimmer with alternative switch may be also wired in combination with alternative switch for the regulation from one place and switching on and off from two places. Inter-wiring of more regulators is not possible.*

617

Kombinacijom regulatora sa naizmničnom sklopkom i ukrsne i naizmnične sklopke omogućava se uključivanje i isključivanje sa proizvoljan broj mesta.

*The combination of dimer with alternative switch and cross and alternative switch provides the switching on and off from the desirable number of places.*

617

Telefonske priključnice sa standardnim RJ12 konektorima u saglasnosti sa IEC 60603-7 u kombinaciji 2 x 6/2 i 2 x 6/4 kontakta. Povezivanje se vrši prema priloženim šemama gde su kontakti a i b osnovna linija, a W i E kontakti druge parice za analogni terminal (prema internacionalnom standardu).

*Telephone sockets with standard RJ12 connectors in compliance with IEC 60603-7 in combination of 2 x 6/2 and 2 x 6/4 contacts. The wiring is carried out in accordance with wiring diagrams where the contacts a and b represent the basic line while W and E are the contacts of the second pair for analogue terminal (according to international standard).*

Pripremljen antenski kabal priključujemo pritezanjem u priključnu stezaljku i stezanjem oklopa kabla priteznom papučicom prema datim šemama.

*Prepared aerial cable may be installed into terminal and shield tightened by tightening clamp according showed scheme.*

Antenski kabal za priključenje na antenske priključnice potrebno je pripremiti prema prikazanoj šemi da bi se postigao siguran kontakt, jednostavno postavljanje i onemogućio eventualni kratak spoj.

*For safe contact, simple installing and short-circuit disabling cable for aerial socket wiring must be prepared according showed scheme.*
